Contents

(Abstracted/Indexed in: Curr. Contents: Phys., Chem. Earth Sci.; Eng., Technol. Appl. Sci., Chem. Abstr., PASCAL/CNRS)

REGULAR PAPERS

Thermodynamics and Calorimetry

Calorespirometric analysis of plant tissue metabolism using calorimetry and pressure measurement
A.J. Fontana, K.L. Hilt, D. Paige (Davis, CA, USA), L.D. Hansen (Provo, UT, USA) and R.S. Criddle (Davis, CA, USA) 1

Determination of the enthalpy of fusion of K_2TiF_6
K. Adamkovičová, L. Kosa, I. Nerád, I. Proks and J. Strečko (Bratislava, Slovak Republic) ... 15

Prediction of excess enthalpies of ketone–alkane systems from infinite dilution activity coefficients
S. Shen and I. Nagata (Ishikawa, Japan) 19

Vitrification and crystallization in the R(−)1,2-propanediol-S(+)1,2-propanediol system
S. Jabrane, J.M. Létoffé and P. Claudy (Villeurbanne Cedex, France) 33

Excess molar enthalpies of binary mixtures containing dialkylcarbonates + cyclic ketones at 298.15 or 313.15 K
R. Francesconi and F. Comelli (Bologna, Italy) 49

Effect of myosin phosphorylation on actomyosin ATPase activity: a flow microcalorimetric study
M. Aurelaino, M.C.P. De Lima, A.P. Carvalho and E.M.V. Pires (Coimbra, Portugal) 59

Hydration effect on urea–non-electrolyte enthalpic pair interaction coefficients. Dissolution enthalpies of urea in aqueous solution of alkoxyethanols at 298.15 K
H. Piekarski and D. Waliszewski (Lodz, Poland) 67

Thermodynamics of alcohol solutions
I. Nagata and K. Gotoh (Kanazawa, Japan) 77

Enthalpies of mixing of tetrachloroethane with furan, methylfuran, tetrahydrofuran, cyclopentanone and 1,4-dioxane
G. Pathak, A.D. Tripathi, U.D. Phalgune and S.D. Pradhan (Pune, India) 109

Thermal Analysis

Étude du système TeO_2–TeF_4. Caractérisation structure et thermique
A. Ider, B. Frit, J.P. Laval (Limoges, France), J. Carré, P. Claudy and J.M. Létoffé (Villeurbanne, France) 117

TG/FT-IR: an analysis of the conditions affecting the combined TGA/spectral response
V. Berbenni, A. Marini, G. Bruni (Pavia, Italy) and T. Zerlia (San Donato Milanese, Italy) 125

The preparation of yttrium oxide from a $Y(N_2H_3COO)_3 \cdot 3H_2O$ precursor in various atmospheres
A. Rahten, J. Maček and B. Novosel (Ljubljana, Slovenia) 135

Kinetic analysis of thermoanalytical data by extrapolating to infinite temperature
N. Koga (Hiroshima, Japan) 145

Thermochemical investigation of nickel(II)–nicotinamide–solvent interactions in solid halogeno and thiocyanato complexes
E. Jópna, A. Sirota, P. Šimon and M. Kubranová (Bratislava, Slovak Republic) 161

Modelling char formation in isothermal and non-isothermal thermogravimetric experiments
M.I. Nelson and J. Brindley (Leeds, UK) 175
On the existence of lower hydrates of M(OH)X (M is Sr, Ba; X is Cl, Br, I)
K. Beckenkamp and H.D. Lutz (Seigen, Germany) 189
A non-isothermal differential scanning calorimetry method for the determination of specific surface energies in polymer crystals
A. Dobreva (Sofia, Bulgaria), M. Alonso, M. Gonzalez, A. Gonzalez and J.A. de Saja (Valladolid, Spain) 197
Synthesis, characterization and mode of thermal decomposition of oxalate complexes of cadmium(II) and zinc(II) with hydrazine, and cobalt(II), nickel(II) and copper(II) with hydrazinium cation
V. Jordanovska (Skopje, Macedonia) and R. Trojko (Zagreb, Croatia) 205

Other Topics
Thermodynamic parameters of lanthanoid(III) complexation with 3-(α,δ-diacarboxy-*n*-propylidene-hydrazino)-5,6-diphenyl-1,2,4-triazine (DCPT). Part 2
A.A.T. Ramadan, M.F. Eid, S.S. Hussein and M.M. Mahmoud (Cairo, Egypt) 219

NOTES

Thermal Analysis
Thermal decomposition of manganese(II) dicarboxylate anhydrides in various atmospheres
Y. Suzuki (Yonezawa, Japan), K. Muraishi and H. Ito (Yamagata, Japan) 231
Thermal decomposition of a Moroccan wood under a nitrogen atmosphere
A. Zeriouh and L. Belkbir (Rabat, Morocco) 243
